

## **Environmental Management Policy**

### **I. Background**

Federal Signal Corporation is deeply committed to responsible environmental management and the preservation of resources. Acknowledging the global significance of environmental issues, we prioritize constructive cooperation to achieve international environmental conservation goals.

Federal Signal Corporation's management establishes stringent requirements to ensure compliance with country and state laws. Our expectations emphasize adherence to all applicable statutory provisions and relevant codes of practice, promoting environmental awareness throughout the organization and preventing environmental harm.

### **II. Requirements and Expectations**

Federal Signal Corporation and its subsidiaries are dedicated to operating facilities in alignment with company policies and relevant legal standards.

Our aim is to create and uphold an environmental management system that prioritizes pollution prevention, resource conservation, and adherence to laws. All employees, contractors, vendors, and suppliers are expected to adhere to this policy.

We are committed to:

- Communicating robust environmental policies
- Assuring that our facilities and products are in compliance with applicable national, regional and local environmental requirements, and in conformance with other applicable environmental obligations
- Minimizing waste
- Implementing energy-efficient measures
- Reducing pollution
- Establishing environmental objectives, and
- Continually improving our environmental management system.
